

### Job Posting: Senior Interior Designer

Work Term: Full-time  
Released: September 2020  
Start Date: Immediate

#### Our work:

Mason Studio is a Toronto-based interior design firm. We create spaces locally, nationally, and internationally ranging from hotels, restaurants, multi-unit residential, private residential, retail shops, exhibitions, and self-initiated design installations at all scales.

#### Our team vision:

We seek team members who see the profession of interior design as a means to something larger. For us, design is a tool to contribute to an enriched life for others and ourselves. It is the people and communities we can positively impact through design that drives our team towards excellence.

#### Your role:

You are, first and foremost, a mighty design leader. You understand that good designs come from advanced leadership and communication skills. You can develop a strong design vision, but also rally the entire team to believe in this vision – internally and externally.

#### Key Responsibilities:

You are responsible for a project's success by generating extremely robust theoretical and conceptual ideas that can bridge design and business. You interpret ideas from all sources, internally and externally, to create a project concept that stands firm through every phase.

#### On a typical day, you may be:

- + Mentoring and guiding project designers through a design development package
- + Collaborating with the design director and design team
- + Sketching, drawing and modelling ideas in 3D
- + Creating internal design standards and process efficiencies
- + Assessing and validating project schedules and resources
- + Researching and verifying building codes and requirements
- + Presenting design documents to the client
- + Communicating with client representatives to interpret needs and feedback
- + Researching design theories, ideas and processes

#### Required Qualifications:

You have completed several projects from concept to completion as a lead designer for a minimum of 8 years. Some of the projects that you have worked on are greater than 25,000 square meters.

#### Preferred Qualifications:

You are a persuasive communicator in Mandarin and English, and have experience managing projects in other countries

#### Key Technical Skills:

You describe and can review ideas effortlessly through AutoCAD, Revit, Adobe Suite, various 3D modeling programs, and your hand sketching skills are superb.

#### Your next step:

We want to hear from you if even to say hi or ask us questions about this position. Send your résumé and a few projects that you are the most excited to share to [careers@masonstudio.com](mailto:careers@masonstudio.com)
